Press Release:

Lichtundfire is pleased to announce and welcomes all to the opening reception of OUTER ORBIT/ OUT OF ORBIT, an exhibition in various media, with painting, photography, digital and process art, and works on paper, that both conceptually and visually highlights the range of work that emphasizes on planetary or star constellations, celestial bodies or the astronomical spheres' influence beyond the Earth's orbit and its gravitational mass. Furthermore, the concept reaches into the realm of an abstracted universe by way of color, medium and processes.

The artists in this exhibition look beyond a terrestrial experience and into the realm of the extraterrestrial sphere inspired by recent technological advancements and achievements, whether by A.I., the Space Programs or the Webb Telescope and their potentials — while also acknowledging that our own human categorizations have led us to push beyond a familiar sphere and into the unknown of an OUTER ORBIT. The attempts of understanding the multiplicity of ourselves has brought up ideas that derive from Quantum Physics to manifestations of our *own Will and its Representation* that defy gravity and the closed circuits of the Earth's spheres.

Beyond the terrestrial planet, the outer orbits seem to promise the near and far grasp of an extension of ourselves unconfined by the laws and categories of a planet threatening to destroy us — mainly due to the willful pressure applied by ourselves. Here, in this exhibition, the work offers a visual chance glimpse into a quantum reality while recognizing that there's so much more in the OUTER ORBIT than our own imagination can conjure..
